

Your partner in wheels,
from production to distribution

ALUMINIUM COMMERCIAL WHEELS

Distributors of Aluminium Commercial Wheels
for the Truck, Bus and Trailer industry

ABOUT **TIA WHEELS**

TIA Wheels (part of the TIA Group) is a leading distributor of steel and aluminium Commercial wheels for the truck, bus and trailer industry.

We leverage our worldwide supply partnerships to produce high-quality wheels that exceed industry standards at affordable prices. Our investments into our partner manufacturers have transformed us into more than just wheel wholesalers; we are now proud OE-approved distributors of our own TIA Wheels brand.

With a complete range of alloy and steel wheels housed in our dedicated 50,000 sq ft UK facility, trust us to source and supply all aspects of your commercial and industrial wheel requirements.

WHY **TIA WHEELS**

We have solidified our position as a reputable business thanks to our unwavering commitment to quality and excellent customer service from a team boasting over 25 years of industry expertise. When you buy from us, we can offer you:

Expert guidance in wheel selection

Our passionate team will provide you with personalised guidance and technical advice to ensure you find your ideal wheels at a competitive price.

A full range of commercial products

From durable steel wheels to polished alloys, we offer a diverse range of commercial wheels to suit a variety of vehicles, from trucks to vans.

Quick delivery

Conveniently located in the Midlands, we can ensure swift responses and delivery arrangements tailored to best suit your needs. We can deliver anything from a single wheel, one pallet to a full trailer load.

OUR **ALUMINIUM WHEELS**

Engineered to perfection with cutting-edge technology at our factories, our wheels are:

- » Forged from a single solid billet of high strength 6061 alloy using a 10,000 tonne forging press
- » T6 heat-treated for increased fatigue strength
- » Optimised with automatic, German-produced CNC machinery
- » Aesthetically enhanced with our automated cleaning and fine polishing production line.

THE **BENEFITS**

Reduce your operating costs and increase your profitability with our aluminium wheels. We offer:

- » Enhanced vehicle aesthetics
- » Reduced fuel consumption
- » Prolonged tyre and break life
- » Improved heat dissipation
- » Increased payload capabilities
- » A Limited 5 year warranty

Our alloys also substantially improve a vehicle's mechanical properties and stability through their:

- » Lower unsprung weight.
- » Optimised lateral run out
- » Low tolerance dimensions
- » Lightweight build (up to 40% lighter than the average steel wheel equivalent!)

CERTIFICATION

TIA Wheels are BS EN ISO 9001: 2005 certified, and all wheels supplied conform to European, EUWA and ETRTO standards of design, manufacture and fatigue testing.

OUR WHEEL FINISHES

ECO SHIELD (ES3)

Our most durable, resistant finish: ES3 easy-clean technology is designed to protect against oxidation and keep your wheels shining effortlessly.

POLISHED

A polished finish will give your wheels a gleaming, mirror polished look; excellent for those who want their fleet to stand out.

MACHINED

The machined non-polished finish gives your fleet a simple but stylish matt look, where weight is the primary consideration.

Introducing

ES3

*The latest development
in our **Eco Shield** range*

SLEEK. DURABLE. EFFORTLESS. **IT CAN ONLY BE ES3.**

Designed to combat oxidation and corrosion with ultimate efficacy, ES3 is the latest technological innovation in our Eco Shield easy-clean range.

ES3 technology creates a protective composition that integrates directly into the aluminium of the wheel itself, acting as a barrier against oxygen and moisture infiltration. Rigorously lab-tested, ES3 technology also allows your wheels to withstand a whopping 1200 hours of salt-spray exposure; So whether you're driving down a coastal town on a hot summer day or braving winter roads covered in salt, we've got you covered.

OE-approved: ES3 wheels offer trusted quality backed by the industry's finest.

Effortless maintenance: A quick wash with light soapy water replaces the need for polishing.

Non-spray coated finish: No chipping or cracking!

WHEEL SPECIFICATIONS

All wheel sizes come in Machined, Polished and Eco Shield (ES3) finishes.

Further sizes are available upon request.

Nuts, donut rings and nut cap covers are available from stock.

No. of Bolt Holes	Bolt Hole Diameter (mm)	PCD (mm)	Centre Hole Diameter (mm)	Disc Thickness (mm)	Offset/HDS (mm)	Load Rating (kg)	Weight (kg)
